WAIVER AND RELEASE OF ALL CLAIMS

The CLIENT acknowledges that any program of fitness exercise involves a risk of injury. The CLIENT acknowledges that Individual Fitness Solutions Ltd. or its staff members are not nor do they claim to be medical doctors, and therefore, cannot take responsibility for any injury or illness related to personal fitness training.

The CLIENT represents that he/she has been recently examined by a medical doctor and been found able to undertake a program of exercise, and has made full disclosure of any injury or illness both past and present.

For and in consideration of the design of an exercise program for CLIENT by _____ (TRAINER) and/or Individual Fitness Solutions Ltd., CLIENT agrees:

1. That any exercise program shall be undertaken by CLIENT at his/her sole risk; and

2. That CLIENT is responsible for notifying TRAINER of any fitness exercise that causes any discomfort or pain; and

3. That it is the decision of CLIENT whether or not he/she will continue the exercise fitness program in the event of injury or illness; and

4. That TRAINER and/or Individual Fitness Solutions Ltd. shall not be liable to CLIENT, nor any other person, for any claims or causes of action whatsoever arising out of or connected with the services of TRAINER and/or Individual Fitness Solutions Ltd.; and

5. That CLIENT hereby releases and discharges TRAINER and/or Individual Fitness Solutions Ltd. from any such claims or actions.

Individual Fitness Solutions Fitness Assessment Preparation

In order to assure that the results of your fitness assessment are as accurate as possible, please review the following guidelines. Your assessment will be given on the assumption that you have followed these recommendations.

1. Wear loose fitting clothes (jogging attire, shorts, athletic shoes, etc.)
2. Avoid eating or drinking 3 hours before your assessment (for best results on body composition tests)
3. Avoid alcohol, tobacco, and coffee for at least 3 hours before your assessment.
4. Avoid exercising on the same day as your assessment. Exercise will elevate your blood pressure and heart rate- invalidating these measures.
5. Try to get a good night's sleep the night before your assessment.
6. Please inform your trainer prior to the assessment if you are suffering from any acute respiratory infection, related condition, or any condition that may affect your test performance.
7. If you have been given a medical questionnaire and/or fitness assessment consent form, please have them completed when you arrive.

Your fitness assessment will consist of measurement of one or more aspects of your health and fitness. It may include your weight, cardiovascular condition (resting and exercise heart rate and performance), body composition, musculoskeletal condition, blood pressure, and body size (circumferences). The objective of your first assessment is to give you a baseline from which to measure your performance and to design the most appropriate exercise program for your current fitness level. Subsequent assessments will provide milestones to help you evaluate your progress.

GOOD LUCK!
